KEYNOTE PAPERS

Adaptive techniques and related issues in finite element modeling of heat and fluid flow <i>G F Carey</i>	1
Application of TCL strategy in engineering and environmental flows <i>T J Craft & B E Launder</i>	15
Buoyancy-driven convection of a contained fluid with unsteady boundary conditions <i>H S Kwak & J M Hyun</i>	31
Challenges in 'RANS' modelling of turbulent thermal and magnetic convection <i>K Hanjalic</i>	45
Computational modeling of flow and heat transfer in industrial applications <i>S V Patankar</i>	61
Direct design of shape <i>H Ashrafizadeh, G D Raithby & G D Stubbley</i>	75
Effect of the thermal wall boundary conditions on scalar transport in clear and particle laden turbulent boundary layer <i>G Hetsroni, C Li, A Mosyak, I Tiselj & E Pogrebnyak</i>	89
Expanded use of CFD in the chemical process industry <i>D Choudury, M S Engelman and L Marshall</i>	105
Heat transfer and fluid dynamics phenomena in molten droplet-surface interactions <i>D Poulidakos</i>	113
Multi-scale computational heat transfer with moving solidification boundaries <i>W Shyy & H S Udaykumar</i>	127
Natural and mixed convection of liquid metals in a magnetic field <i>H Ozoe</i>	139
Parallel processing of CFD and radiative heat transfer <i>M P Owens, I P Jones & P W Guilbert</i>	155
Probability density function approach for turbulent hydrodynamics and heat and mass transfer in two-phase dispersed flows <i>I V Derevich</i>	165
Review of China's computational heat transfer: a summary of selected papers presented in the China National CHT conferences <i>Z Zhang</i>	185
The time dimension, computational algorithms, and heat transfer computations <i>K K Tamma, X Zhou & D Sha</i>	201

PANEL DISCUSSION

Panel discussion on grid generation <i>R Douglass, G Carey, D R White, G Hansen, Y Kallinderis & N P Weatherill</i>	215
--	-----

APPLICATIONS

A numerical study of cross flow compact heat exchangers <i>U D'Ortona, L A Luo & D Tondeur</i>	221
Application of the Eulerian-Lagrangian method to water jet cooling of a hot moving strip <i>F Bierbrauer, W K Soh & W Y D Yuen</i>	229
Convective and conductive heat transfer in the blast furnace cohesive zone: effect of softening and melting <i>D Maldonado, S J Zhang, A B Yu, S J Chew & P Zulli</i>	237
Cooling of electric-train inverters by draft air flow under the train floor <i>A Nishihara, Y Hara & K Sasaki</i>	245
Forced convection modeling around a bicycle-helmeted head <i>A J Ellis, I S Wong, A F Bertolini & L A Thompson</i>	253
Heat and mass transfer during post baking bread chilling; effect of surface conditions on the chilling time <i>J Monteau, A Grenier, A Le Bail & M Hayert</i>	261
Heat and mass transfer performances of closed-type cooling towers <i>J Y Jang & Z G Wang</i>	269
Mass effects on temperature estimation in a PPECB brick house <i>Z Zhao, K McManus & J Naser</i>	277
Numerical simulation of online laser curing of thermoset composites in filament winding <i>X Wang & D Y S Lou</i>	285
Numerical simulation of pulse tube cryocoolers <i>X Deng, P Mayzus, L Fang, O R Fauvel & L Bauwens</i>	293
Parametric study of disc brake rotor with diamond and tear-drop pillars <i>L Wallis, E Leonardi, B E Milton & P Joseph</i>	301
Simulation of compact equipment for thermal treatment of wastes using CFD and experimental validation <i>V Fabikovic, P Stehlik, P Strasak, P Kolar, R Stulir & J Oral</i>	309
Three dimensional presolidification heat transfer and fluid dynamics in molten microdroplet deposition <i>V Butty, D Poulidakos & J Giannakouros</i>	317
Three-dimensional numerical modelling of flow and heat transfer over louvered fin arrays <i>S M El-Hawat, M R Heikal & S S Sazhin</i>	325
Transient analysis of U-tube steam generator using EICE technique <i>C S Utkarsh & J B Doshi</i>	333
Transient heat transfer in buried pipelines during hydrostatic testing <i>P Cooper, Y Arfiadi, A Croker & M N S Hadi</i>	341

COMBUSTION

A numerical comparison of combustion and heat transfer in compartment fires <i>R Yuen, G H Yeoh & D Chen</i>	349
Combustion/radiation/turbulence interaction modelling in nonpremixed flames <i>P Giordano & D Lentini</i>	357
Gas/diesel dual-fuel combustion modelling for engine conditions <i>H Miao, B E Milton & R T Casey</i>	365
Hydrogen production by superadiabatic combustion of hydrogen sulfide <i>P I Porshnev, A A Fridman, A Saveliev, J P Bingue & L A Kennedy</i>	373
Modeling the formation of flammable environments within partially empty liquid fuel containers <i>R Bunama & G A Karim</i>	381
Modelling of heat transfer and ignition processes in a diesel spray <i>S S Sazhin, E M Sazhina, G Feng, M R Heikal, I Goldfarb, V Gol'dshtein & G Kuzmenko</i>	389
Numerical analysis of premixed combustion in a double-layered radiant porous burner <i>L Younis, A A Mohamad & I Wierzba</i>	397
Numerical investigation of mass and heat transfer in sodium pool combustion <i>A Yamaguchi & Y Tajima</i>	405
Numerical simulations of coal-fired furnaces using a vectorized Lagrangian particle model coupled with the discrete ordinates method <i>J Ströhle, T Sabel, U Schnell & K R G Hein</i>	413

COMPUTATIONAL & MATHEMATICAL METHODS

A boundary value problem with irregular boundary conditions <i>D Vidovic</i>	421
A Newton-Krylov matrix-free pressure-velocity coupling of compact finite volume navier-stokes equations <i>J M C Pereira, N P C Marques, M H Kobayashi & J C F Pereira</i>	429
A numerical method for heat transfer across deforming fluid interfaces <i>M R Davidson & M J Rudman</i>	437
Accurate parallelized solution for coupled domains: the FDEM (Finite Difference Element Method) with dividing lines/surfaces <i>W Schoenauer & T Adolph</i>	445
Applications of inverse modelling to alloy wheel casting <i>D P K Singh, G D Mallinson & S M Panton</i>	453
Fixed mesh front tracking method for dendritic solidification <i>P Zhao, J C Heinrich & D R Poirier</i>	461
Numerical accuracy of temperature, velocity and pressure distributions predicted with efficient finite-differencing (EFD) scheme <i>V Kriventsev, H Ninokata & A Yamaguchi</i>	469
Smoothing pressure correction on unstructured mesh <i>A W Date</i>	477
Temperature reconstruction using a new entropy-based regularization method <i>F M Ramos, H F C Velho, W B Muniz, J C Carvalho & N J Ferreira</i>	485

The influence of source terms on a gradient-based curvilinear grid scheme applied to a non-local thermal equilibrium reacting flow <i>G M Lloyd, A Razani & K J Kim</i>	493
--	-----

CONDUCTION

A statistical model of thermal contact conductance <i>G Buonanno, A Carotenuto & G Giovenco</i>	503
An algorithm for inverse determination of thermal conductivity <i>S Chantasiriwan</i>	511
Conduction heat transfer calculations using structured and unstructured grids <i>J C Chai, M Zhang, J P Moder & S V Patankar</i>	519
Contact thermal resistance in circular composite structural column under transient and high temperature conditions <i>J Ghajel</i>	527
Identification of destruction in metallurgical equipment by solving the inverse heat conduction problems <i>Y Matsevity, V Timchenko & A Kostikov</i>	535
Modeling of constriction resistance at coated joints in a gas environment <i>E L Olsen, S V Garimella & C V Madhusudana</i>	543

FORCED CONVECTION

3-D investigation of transpiration cooled coated plates and homogenisation of their thermal properties <i>G Laschet, S Rex, D Bohn & N Moritz</i>	551
Chebyshev approximation for heat transfer in an axisymmetric stagnation flow on a cylinder <i>R S R Gorla, A Salem, M A Mansour & H M El-Hawary</i>	559
Correlations for heat and mass transfer coefficients over blunt flat plates <i>Z F Sun</i>	567
Effect of periodic upstream oscillations on convective heat transfer in an unsteady separated flow <i>N Djilali & A Bouhadji</i>	575
Finite element calculation of friction factors and Nusselt numbers for rectangular ducts <i>C du Toit</i>	583
Fluid flow with heat transfer downstream of a 3-D backward-facing step <i>D B Carrington & D W Pepper</i>	591
Heat transfer in intensive cooling with turbulence bushes <i>S Kühne, G H D Mühlenbruch & J Schmidt</i>	599
Heat transfer predictions in ribbed ducts and cavities <i>G Iaccarino, A Ooi, M Behnia & P Durbin</i>	607
Hysteresis phenomena of combined forced and natural convection from single row of five cylinders <i>Prabowo, N Tajima & Y Kikuchi</i>	615
L.E.S. of heat transfer over a backward step <i>O Labbé, E Montreuil & P Sagaut</i>	623

Numerical simulation of impinging jet heat transfer in the presence of crossflow <i>A Abdon & B Sundén</i>	631
Numerical turbulent heat transfer in ribbed channels and impinging ducts <i>M Rokni, R Jia & B Sundén</i>	639
Reverse computation of forced convection heat transfer using adjoint formulation <i>K Momose & H Kimoto</i>	647
Temporal behaviour of flow in rotating cavities <i>P G Tucker</i>	655
The influence of fluid rheology on heat transfer in laminar impinging flows <i>A Chatterjee, S S Kapur & S C Dhingra</i>	663
Turbulent convective heat transfer in a fully-developed wavy triangular duct <i>M Rokni & T B Gatski</i>	671
Unsteady heat transfer due to time dependent free stream velocity <i>R S R Gorla</i>	681
Unsteady heat transfer in elliptical coordinates involving convective heat transfer through boundaries <i>D Trajkovski</i>	689

VOLUME 2

METAL MANUFACTURING & PROCESSING

Heat and mass transfer in the fusion zone of laser beam welding processes <i>A Mahrle & J Schmidt</i>	697
Modelling of laser drilling process using a moving front heat source <i>P He, E Leonardi & P Mathew</i>	705
Modelling of the thermal behavior of aluminum coil in the annealing furnace <i>C D Chen & C M Chien</i>	713
Modelling of transport phenomena in laser surface alloying with distributed melting of alloying element <i>P Mohan Raj, S Sarkar, S Chakraborty, G Phanikumar, P Dutta & K Chattopadhyay</i>	721
Numerical simulation for heat transfer behavior of slab in hot rolling <i>W Wu & X Zhang</i>	729
Temperature and heat flux distribution in metal plate in the plasma arc cutting process <i>P Koltun & S Ramakrishnan</i>	737

NATURAL CONVECTION

A numerical simulation of the daytime natural convection in a reservoir sidearm <i>C Lei & J C Patterson</i>	745
A spectral finite difference analysis of natural convection in a cavity <i>Y Mochimaru</i>	753
An innovative approach to the modelling of natural circulation <i>G Desrayaud, A Fichera & A Pagano</i>	761

Buoyancy-driven flow transitions in deep cavities heated from below <i>C Xia & J Y Murthy</i>	769
Convective and diffusive phenomena of air in a vertical cylinder under a strong magnetic field <i>T Tagawa, H Ozoe, K Sassa & S Asai</i>	777
Convective flow induced by localized traveling magnetic fields <i>K Mazuruk</i>	785
Direct numerical simulation of Benard-Marangoni convection <i>M Medale & P Cerisier</i>	791
Double diffusive convection for two-layer system of low Prandtl number fluid <i>K Kamakura & H Ozoe</i>	799
Free convection in tall cavities <i>S Dhimdi & P Vandevelde</i>	805
h-adaptive finite element solution of natural convection in an air filled cavity <i>D A Mayne, A S Usmani & M Crapper</i>	811
Heat transfer analysis of a thermally stratified storage tank <i>J E B Nelson, A R Balakrishnan & S S Murthy</i>	819
Hysteresis phenomena in the problem of cold water natural convection in square cavity <i>E V Kalabin, D A Morgun & P Zubkov</i>	827
Investigations of natural convection in large pools on the example of heating up the secondary side of an emergency condenser <i>E Krepper, E F Hicken & H Jaegers</i>	835
Natural convection in a vertical rectangular enclosure with symmetrically localized heating and cooling zones <i>T Fukui, I Ishihara & R Matsumoto</i>	843
Natural convection of air in a shallow cylinder of the aspect ratio three under a high magnetic field <i>S Maki, T Tagawa & H Ozoe</i>	851
Numerical study of natural convection in a rectangular enclosure filled with two immiscible fluids <i>N Moshkin</i>	859
On the effect of reducing the sectional area in vertical open-ended channels <i>G Desrayaud & A Fichera</i>	867
Rayleigh-Benard convection in a perfectly conducting cubical cavity at $Pr=0.7$ <i>J Pallares, I Cuesta & F X Grau</i>	875
Rayleigh-Benard convection in a vertical cylinder <i>S S Leong</i>	883
Seebeck effect convection of liquid metal in an enclosure with wall Seebeck coefficient <i>M Kaneda, T Tagawa & H Ozoe</i>	891
Simulation of buoyancy-driven flow and heat transfer in a horizontal annulus with vertical eccentricity <i>F Shahraki & R Bragg</i>	897
Some numerical investigations of multi-cell natural convection in a vertical slot <i>C H Li</i>	905
Thermal analysis of nanoscale electronic devices by spectral methods <i>A U Coskun, O Ilgebusi & Y Yener</i>	913

Three-dimensional driven-cavity flows with a moderate temperature gradient <i>H A de Souza & E F Rodrigues</i>	921
Three-dimensional numerical simulation of spoke pattern in Bridgman top seeding convection <i>J S Szmyd, M Jaszczur, H Ozoe & K Kakimoto</i>	929
Turbulent natural convection with an internal heat source in a semicircular geometry <i>H Lee, G Park & K Y Suh</i>	937

POROUS MEDIA

An advance porous media method for transient multidimensional two-phase flow thermal-hydraulics in complex geometries with rod or tube bundles <i>Z V Stosic & V D Stevanovic</i>	945
A porous media method three-dimensional numerical investigation of two-phase flow thermal-hydraulics within advanced nuclear fuel rod bundles <i>Z V Stosic & V D Stevanovic</i>	953
A porous media numerical prediction of void fraction and drift velocity in two-phase flow across horizontal tube bundles <i>Z V Stosic & V D Stevanovic</i>	961
Heat and mass transfer in porous fuel cell electrodes <i>R Bradean, K Promislow & B Wetton</i>	969
Heat transfer from a cylinder covered with a porous layer in cross-flow <i>B Abu-Hijleh</i>	977
Heat transfer with phase change in porous media exposed to high heat load <i>S Ebara, S Toda, H Hashizume, A Shimizu & T Yokomine</i>	985
Numerical modelling of three-dimensional steady-state convection and mineralization in fluid-saturated rocks <i>C Zhao, B E Hobbs, H B Mühlhaus & A Ord</i>	993
Three-dimensional adaptive computation of brine transport in porous media <i>J Lang & B Erdmann</i>	1001

RADIATION

Comparative performance of non-gray gas modeling techniques and band regrouping efficiencies <i>V Goutière, A Charette & L Kiss</i>	1009
Comparison between a numerical model and an experimental approach of preform infrared radiative heating - recent results <i>S Monteix, F Schmidt, Y Le Maoult, G Denis & M Vigny</i>	1017
Computation of multi-mode heat transfer with internal radiation and phase change <i>S R Mathur & J Y Murthy</i>	1025
Directional spectral emittance of a packed bed with coupled conduction-radiation heat transfer <i>D Baillis & J F Sacadura</i>	1033
Genetic algorithm shape optimisation of radiant heaters for thermal processing applications <i>B M Shaughnessy & M Newborough</i>	1041

Molecular dynamics simulation of ultra-fast thermal transition in thin foil irradiated by high power ultra-short laser <i>E Hoashi, K Ezato, T Kunugi, T Yokomine & A Shimizu</i>	1049
Radiation heat transfer in a glass lehr <i>L A Bertram</i>	1057
The path length effect on the total gas absorption coefficient within a volume element on an axisymmetric computational mesh <i>M Caldas & V Semião</i>	1065
Two-dimensional transient radiative heat transfer using discrete ordinates method <i>Z Guo & S Kumar</i>	1073

SOLIDIFICATION

A continuum model for simulation of momentum, heat and mass transfer in the falling film crystallization process <i>J W Zhang & Z Zhang</i>	1081
A numerical study of the mephisto experiment <i>V Timchenko, P Y P Chen, E Leonardi, G de Vahl Davis & R Abbaschian</i>	1089
Anisotropy and convection during directional solidification <i>J Kaenton, G de Vahl Davis, E Leonardi & S S Leong</i>	1097
Computational model for solutal convection during directional solidification <i>M El Ganaoui, A Lamazouade, P Bontoux, E Leonardi & G de Vahl Davis</i>	1105
Convictional control in silicon melts under a rotating magnetic field <i>M Akamatsu, M Higano & H Ozoe</i>	1113
Effects of g-jitter on directional solidification <i>C Benjapiyaporn, G de Vahl Davis, E Leonardi, S S Leong & V Timchenko</i>	1121
Hysteretic thermocapillary flow inside a NaNO ₃ float zone under μ -g condition <i>C T Nguyen, H Bazzi & N Galanis</i>	1129
Investigation of features of lateral dopant distribution in Ge single crystals grown by AHP method <i>V D Golyshchev, M A Gonik, V B Tsvetovsky, M P Marchenko & I V Frjazinov</i>	1137
Magnetic field suppression of melt flow in crystal growth <i>B H Dennis & G S Dulikravich</i>	1145
Mathematical model and numerical simulation of turbulent flow, heat transfer and solidification in a rectangular cavity with a sheet traversing along the symmetrical axis <i>Y Feng & X Zhang</i>	1153
Methods of solution of convective heat mass transfer at single crystal growth problem <i>V Ginkin</i>	1161
Micro/macro modelling of heat transfer in the process of composite in situ formation <i>K Rabczak & W Wolczynski</i>	1169
Numerical study of Marangoni effects during solidification under microgravity conditions <i>M Giangi, F Stella, E Leonardi & G de Vahl Davis</i>	1177

On the optimal cooling control for continuous casting problem <i>R Dautov, E Laitinen, A Lapin & M Rekkilä</i>	1185
Representing realistic complexity in numerical models of crystal growth: coupling of global furnace modeling to three-dimensional flows <i>A Yeckel, A Pandey & J J Derby</i>	1193
Sensitivity on the heat flux shape of thermo-capillary convection in side-heated liquid bridge: preliminary results <i>R Bennacer, A A Mohamad, G Labrosse & H Beji</i>	1201
Solidification of continuously cast steel <i>F Kavicka, J Stetina, P Ramik & B Sekanina</i>	1209

TURBULENCE

Comparison of LES, DES and RANS applied to the flow over wall-mounted cubes <i>S Schmidt and F Thiele</i>	1219
Influence of free-stream turbulence on heat transfer and boundary layer flow on the turbine blade <i>K H Koo & Y J Kim</i>	1227
Numerical simulation of three-dimensional turbulent flow in a complex geometry, with LDV experimental confirmation <i>W Q Tao, J H Nie, P Cheng & Q W Wang</i>	1235
Unstructured LES of turbulent heat transfer on a compound surface-mounted cube <i>B Niceno, A D T Dronkers & K Hanjalic</i>	1243

TWO-PHASE FLOW & HEAT TRANSFER

Calculation of supersonic mist flow with shock waves by new subsonic method <i>T Sugiura & M Nakagawa</i>	1251
Determination of heat transfer to liquid films falling on a vertical surface under different conditions <i>J Gyls & S Sinkunas</i>	1259
Interface tracking for the prediction of interfacial dynamics and heat/mass transfer in multiphase flows <i>D Lakehal, M Meier, J Davis, B L Smith & G Yadigaroglu</i>	1267
Modeling of high pressure swirl hollow cone fuel spray <i>G Bella, A De Vita & R Rotondi</i>	1275
Numerical analysis of heat transfer in mist flow <i>G Croce, H Beaugendre & W G Habashi</i>	1283
Numerical modelling of local void fraction profile in subcooled boiling flow at low pressure <i>G Yeoh & J Tu</i>	1291
Numerical prediction of axial void fraction distribution in subcooled boiling flow at low pressure <i>J Tu & G Yeoh</i>	1299
Numerical simulation of particle trajectory in free board region of a centrifugal fluidized bed <i>M H Shi & Y L Hao</i>	1307

Two-phase heat transfer on an isothermal vertical surface <i>F Bazdidi-Tehrani & S Zaman</i>	1315
---	------

VALIDATION & VERIFICATION

Benchmark summary of numerical studies: 3-D natural convection in an air-filled enclosure <i>D W Pepper & G T Hollands</i>	1323
3-D natural convection benchmark in an enclosure using penalty and pressure projection methods <i>D B Carrington, D W Pepper & J C Heinrich</i>	1331
Benchmarking procedures in computational mechanics, CFD, and heat transfer: are experiments the best answer? <i>D V Murty</i>	1337
Finite volume computations of buoyancy-driven flow in a cubical cavity: a benchmarking exercise <i>C Xia, J Y Murthy & S R Mathur</i>	1345
Natural convection in an air-filled cubical cavity <i>E Krepper</i>	1351
Natural convection in an air-filled cubical cavity under different angles of inclination: a benchmark study <i>S Kenjeres, S B Gunarjo & K Hanjalic</i>	1357
Natural convection in an air-filled cubical cavity: contribution to the validation exercise <i>J Pallares, I Cuesta & F X Grau</i>	1365
Prediction of natural convection in an air-filled cubical cavity using Fluent software <i>R Mossad</i>	1371
Simulation of natural convection in an air-filled cubical cavity using CFD-ACE+ <i>N Solanki, D M Wang, A K Singhal & R W Cresswell</i>	1377
Transient natural convection in air-filled cubical cavity: validation exercise <i>R Bennacer, A A Mohamad & I Sezai</i>	1385
Validation of the mathematical models of heat and mass transfer processes <i>J Donizak, J C Escobedo Bocardo, A Holda, Z Kolenda & M Zembura</i>	1391
